## Area of Circles Guide Notes

## Circle

A circle is a boundary of a round region in a plane.

## Area of a Circle

The area of a circle is the product of the two constant $\pi$ and the square of the length of the radius of the circle.

$$
A=\pi r^{2}
$$

The area of a circle, with the diameter of $d$, is

$$
A=\frac{\pi d^{2}}{4}
$$

Sample Problem 1: Find the area of the following circle.
1.

2.

## Area of Circles Guide Notes

Sample Problem 2: Solve Problems involving the area of a circle.
4. The area of the circle G is $81 \pi$. Find its diameter.
5. Find the radius of a circle Fif its area is $169 \pi \mathrm{~cm}^{2}$.
6. Find the area of a circle with a diameter of 21 m .
